#### 4. DISCUSSION: WHAT, WHY, HOW

Traffic Law Enforcement is initiated within the City by Traffic Services in areas North, South, East and West. The Technical Section operates City wide with specific attention to speed enforcement, public transport etc.

The Strategic Focus Areas of Traffic Services:

- To contribute to the reduction of the accident rate in the City;
- To carry out traffic management effectively and efficiently;
- To improve the response times to incidents and complaints;
- Increased driver and pedestrian safety;
- Improved traffic and licensing service delivery;
- Improve visible traffic policing of public transport.
- To enhance revenue collection

There has been an increase in September 2020 comparatively to the previous year in both Driver and Learner licence tests conducted. A similar trend emerged as pertains to income which was slightly under compared to the same period in the previous financial year. Seemingly as the Covid levels reduced there is an upward trend emerging and we are expecting this trend to continue and further boost our income and test figures. We remain optimistic that should the upward trend continue we will certainly be on a recovery path.

The most significant difference in statistics has been the number of arrests compared to last year and this is because of the impact of the lockdown and Covid. The general offences are however almost at a par with the previous year but it is mostly attributed to the camera type of offences. Factors that have impacted on traffic related enforcement is the instruction to deal with land invasions as a priority and the consideration of the spread of Covid when attending to direct contact with the public.
