Flooding in the Uitsig / Ravensmead Area

PRESENTATION TO SC 4 | 22 October 2020

Catchment and Stormwater Management Branch

Water and Waste | Water and Sanitation

Making progress possible. Together.

Tender 370C/2016/17:- Elsieskraal River Master Planning Current Status - (Ravensmead modelling)

- The City of Cape Town has completed a Stormwater Masterplan Study for the greater Elsieskraal River Catchment area.

- This study Commenced 04 April 2018 with a updated **completion date of 30 April 2020**, however;
  - This included certain additional works that have been identified/requested.
    - in part, flooding analysis in the Ravensmead area, which forms part of the Elsieskraal catchment.

  - Due to the impacts of COVID-19 Lockdown and the additional works the Consultant submitted a Claim for Extension of Time. This Extension of Time required the submission of a deviation report to SCM for City Managers approval;
    - The City's Engineering Services Units approved the extension of time to **30 May 2020.**

Way Forward - Ravensmead

- The proposed upgrade options presented in the Elsieskraal Master Plan Study for the Ravensmead area will be considered along with other projects included in the City's Prioritization Model.

- Outcomes from the Prioritization Model will be considered in a prioritized order for implementation.

- Implementation will then be dependent upon:
  - Budget allocation and appointment of the Departmental PSP (likely October 2021).
  - Detailed design will follow and then procurement of the construction contractor, which in itself can take up to 12 months.
  - A programme for implementation will be provided in due course following the prioritization analysis and confirmation of budget allocation, and is subject to appointment of the PSP.

Way Forward - Uitsig Stormwater Model

- The master plan study for Uitsig is dependent on budget availability and a PSP being appointed.
- Currently the CSRM Branch has limited budget for master plans.
- Additional budget will be sought and motivated as necessary. The Departmental PSP tender is currently under review by SCM. CSRM await feedback from SCM.
