3. PURPOSE

To inform the subcouncil about service-delivery progress by Community Services and Health: City Health Department Area 3 Central, TYGERBERG, made during the period 1 October 2019 to 31 December 2019.

4. FOR DECISION BY

The report is noting by subcouncil 6.

5. EXECUTIVE SUMMARY

This report is for the health facilities within the boundaries of subcouncil 6 for the period 1 October 2019 to 31 December 2019. The report covers both Personal Primary Health Care (PPHC) and Environmental Health Services (EH). Overall the facilities are doing well and are meeting most of its targets (detailed performance report available on request).

6. RECOMMENDATIONS

Making progress possible. Together.

It is recommended that this report on progress in Health service delivery be noted.

## AANBEVELING

Daar word aanbeveel dat daar van hierdie vorderingsverslag oor gesondheidsdienslewering kennis geneem word.

## IZINDULULO

Kundululwe ukuba makuqwalaselwe le ngxelo engenqubela ngokumalunga nokuhanjiswa kweenkonzo zezeMpilo.

## 7. DISCUSSION/CONTENTS

City Health Department is responsible for two main focus areas of service delivery namely; Personal Primary Health Care (PPHC) which includes Kasselsvlei Clinic, Parow Clinic and St. Vincent CDC as well as Environmental Health Services (EH). The performance of each unit is presented below as measured against specific set SDBIP targets.

### 7.1 PERSONAL PRIMARY HEALTH CARE

This part of the report highlights performance of the clinics in relation to the SDBIP, focusing on key indicators namely reduction of HIV, AIDS, TB & Sexually Transmitted Infections (STI), reduction of death rate for children under 5 years, antenatal care & teenage pregnancy.

#### Human Immunodeficiency Virus (HIV), Acquired immune deficiency syndrome (AIDS), and Tuberculosis (TB) & Sexually Transmitted Infections (STI) Programme:

This programme is aimed at preventing and reducing the aforementioned diseases and related deaths. For the period under review, performance for this programme is as follows: -

All facilities did not meet the target for the number of total clients tested for HIV. Facilities will relook at current practices, and do more promotional activities to emphasize the importance of testing.

All the facilities exceeded the targets for the number of new clients enrolled on anti-retroviral treatment and the percentage of HIV positive TB patients commenced on anti-retroviral treatment.

All facilities did not meet the target for the number of male condoms distributed, except Kasselsvlei clinic. Clinic distribution has increased from last quarter and is actively looking for new distribution sites, more health talks are given on the importance of dual protection.

SDBIP Indicator			
Number of total clients tested for HIV			
Facility	Target	Achieved	Comment
Kasselsvlei Clinic	1 125	1 118	Target not met, but accumulatively up-to-date
Parow Clinic	1 125	923	Target not met
St. Vincent CDC	2 250	1 802	Target not met
SDBIP Indicator			
Number of new clients enrolled on Antiretroviral Treatment (ART)			
Facility	Target	Achieved	Comments
St. Vincent CDC	15	15	Target met
SDBIP Indicator			
% HIV +ve TB patients commenced on ART's			

Facility	Target	Achieved	Comments
Kasselsvlei Clinic	90%	100%	Target exceeded
Parow Clinic	90%	100%	Target exceeded
St. Vincent CDC	90%	100%	Target exceeded
<b>SDBIP Indicator</b>	Number of male condoms distributed		
Facility	Target	Achieved	Comments
Kasselsvlei Clinic	180 000	264 000	Target exceeded
Parow Clinic	180 000	109 600	Target not met
St. Vincent CDC	225 000	120 000	Target not met

### Child and Youth Health

Programmes under child health and youth health are aimed at preventing and reducing childhood and youth diseases as well as deaths related to such diseases. Child and Youth Health programmes performance are as follows: -

Health care facilities exceeded the target for the percentage immunisation coverage from hexavalent 1<sup>st</sup> dose to fully immunised under one year and the percentage of preschools visited.

The target for the number of reproductive health clients under 18 years were met at all facilities, except St Vincent CDC. Clinic booked appointment with schools to render service.

Target met for the number of visits to schools for health promotion outreach programmes, except St. Vincent CDC. Clinic booked appointments with 4 schools.

<b>SDBIP Indicator</b>	% immunisation coverage from hexavalent 1 <sup>st</sup> dose to fully immunised < 1 year		
Facility	Target	Achieved	Comments
Kasselsvlei Clinic	90%	105%	Target exceeded
Parow Clinic	90%	95%	Target exceeded
St. Vincent CDC	90%	93%	Target exceeded
<b>SDBIP Indicator</b>	% preschools visited		
Facility	Target	Achieved	Comments
Tygerberg EH	98%	100%	Target exceeded
<b>SDBIP Indicator</b>	Number of < 18 years reproductive health clients		
Facility	Target	Achieved	Comments
Kasselsvlei Clinic	45	47	Target exceeded
Parow Clinic	30	36	Target exceeded
St. Vincent CDC	90	48	Target not met
<b>SDBIP Indicator</b>	Number of visits to schools for health promotion outreaches programmes		
Facility	Target	Achieved	Comments
Kasselsvlei Clinic	1	1	Target met
Parow Clinic	1	3	Target exceeded
St. Vincent CDC	1	0	Target not met
Environmental Health	8	10	Target exceeded

### Women's Health

Women's Health is one of the priority programmes that the City monitors very closely. This programme is aimed at preventing and reducing disease and deaths of women as result of cancer, child birth etc.

All health facilities met the target for the number of cervical smear coverage, except St Vincent CDC. Home based carers have started recruiting at home visits and on Friday the SPN goes to Chestnut Satellite clinic. There has been an improvement since October.

All health care facilities exceeded the target for percentage antenatal 1<sup>st</sup> visits before 20 weeks, except St Vincent CDC. More awareness campaigns will be held both in the facility and the community to educate clients on the importance of booking early in pregnancies.

Health facilities did not meet the target the number of female condoms distributed, except Kasselsvlei clinic. Female condoms are still a challenge due to reluctance of the community to use it, but the department will continue to raise awareness.

SDBIP Indicator			
Number of cervical smear coverage			
Facility	Target	Achieved	Comments
Kasselsvlei Clinic	75	126	Target exceeded
Parow Clinic	75	84	Target exceeded
St. Vincent CDC	234	129	Target not met
SDBIP Indicator			
% Antenatal 1 <sup>st</sup> visit before 20 weeks			
Facility	Target	Achieved	Comments
Kasselsvlei Clinic	70%	82%	Target exceeded
Parow Clinic	70%	93%	Target exceeded
St. Vincent CDC	70%	67%	Target not met
SDBIP Indicator			
Number of female condoms distributed			
Facility	Target	Achieved	Comments
Kasselsvlei Clinic	9 300	10 000	Target exceeded
Parow Clinic	4 800	3 200	Target not met
St. Vincent CDC	11 100	4 000	Target not met

## 7.2 ENVIRONMENTAL HEALTH

This part of the report covers the performance of Environmental Health Services on key SDBIP indicators.

### Informal Settlements

Once a week environmental health practitioners (EHP) visit every informal settlement to monitor conditions. For the period under review the EHP's have done 169 visits against the target of 169, i.e. target exceeded for the reporting period. However, the target for health and hygiene projects in informal settlements was not met.

SDBIP Indicator	TYGERBERG		Overall Subdistrict Performance
	Target	Actual	
Number of monitoring visits done to informal settlements to identify potential Health Hazards	169	169	Target met
Number of Health & Hygiene Projects related to informal settlements	9	13	Target exceeded

### Water Safety & Quality

A total of 273 water samples were tested and all were compliant with the quality standards, thus exceeding the target for compliance of 99% for the subdistrict.

All (100%) of the samples tested were compliant with the quality standards, thus exceeding the target of 99% for the subdistrict. These samples are taken at strategic points linked to the end users.

SDBIP Indicator	TYGERBERG		Overall Subdistrict Performance
	Target	Actual	
% routine domestic water samples complying with SANS 241 quality standards	99%	100%	Target exceeded

### Vector Control

Vectors are responsible for carrying various illnesses from one place to the other, therefore their control and management is important. The target for number of block baiting stations serviced for controlling rats was not met.

SDBIP Indicator	TYGERBERG		Overall Subdistrict Performance
	Target	Actual	
Number of block baiting stations for vector control of rats	1 188	2 069	Target exceeded

### Food Hygiene and Safety

On a regular basis, environmental health practitioners (EHPs) take food samples from various outlets/businesses to monitor food hygiene and safety. These samples included food products, bacteriological swabs from the hands of food handlers and surfaces where food products are prepared.

A number of 185 food samples were tested and 158 (85%) were compliant with legislation standards, thus exceeding the target of 75% for the sub district. The necessary remedial actions were taken in all cases of non-compliance which included written notices to owners and managers of restaurants and butcheries.

SDBIP Indicator	TYGERBERG		Overall Subdistrict Performance
	Target	Actual	
% food samples complying with relevant legislation standards	75%	85%	Target exceeded

### Pre-School visits

A total of 396 (100%) pre-schools were visited during the reporting period in order to ensure compliance to the relevant environmental health standards for child care centers. Monitoring of these facilities include health and safety aspects referred to in terms of the Early Childhood Policy of the City of Cape Town and the Regulations Governing General Hygiene Requirements and the Transport of Food. Target was exceeded.

SDBIP Indicator	TYGERBERG		Overall Subdistrict Performance
	Target	Actual	
% preschools visited	98%	100%	Target exceeded

8. Sustainability implications

Does the activity in this report have any sustainability implications for the City?

No ☒ Yes ☐

9. Staff implications

Does your report impact on staff resources or result in any additional staffing resources being required?

No ☒ Yes ☐
