

WATER SAVING HAND WASHING THE SQUEEZE BOTTLE

STEP 1: YOU WILL NEED

- A Clean 2 ℓ plastic bottle with cap
- 80 cm of clear 4mm irrigation pipe, Scissors
- A sharp tool to draw holes on the cap

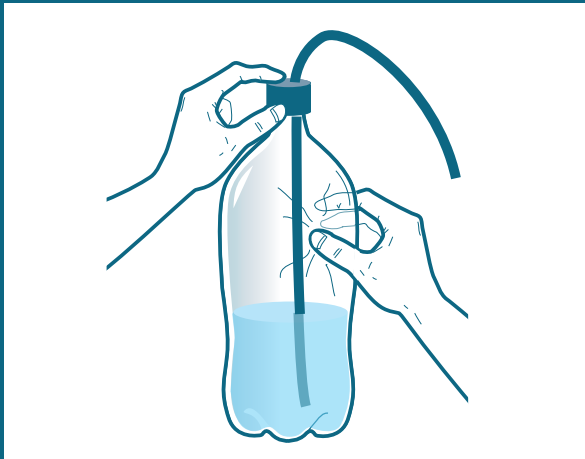

STEP 2: PREPARING YOUR BOTTLE

- Use a sharp tool to make 2 small holes on the bottle cap

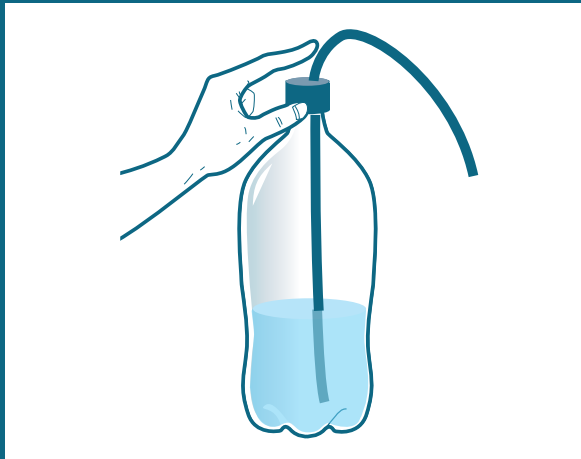

STEP 3: ASSEMBLING

- Push the pipe in, until it touches the bottom.
- Fill the bottle with water and tighten the lid.

STEP 4: LET THE WATER FLOW

- Cover the open hole with your finger, whilst squeezing the bottle.

STEP 5: RELEASE

- Take the finger off from the hole when the water starts flowing.

STEP 6: WASH YOUR HANDS

- Use soap
- Collect the water used in a bucket.

STEP 7: STOP THE WATER

- Lift the pipe above the bottle cap and the water will stop flowing.

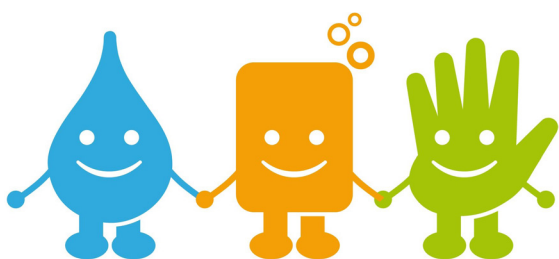

STEP 8: REUSE WATER

- The water collected can be used for flushing

SAFETY PRECAUTIONS

- Keep the squeeze bottle out of sunlight.
- Rinse and change water every second day
