

HOW TO MAKE A TIPPY TAP

Step 1:

What you need to make the tippy tap:

- Plastic bottle with screw-on cap
- Medium plastic tube
- Pliers
- Screwdriver
- Short piece of metal wire
- Candle
- Rope
- Bar of soap

Step 2:

Clean the bottle well.

Step 3:

Heat the wire over the lit candle. Make a small hole in the lower part of the bottle.

Step 4:

Push the plastic tube through the hole of the bottle, the tube should fit tightly.

Step 5:

Push a hole through the soap with the screwdriver.

Fill the bottle with water and replace the cap

When the cap is tight, no water should flow through the tube.

When the cap is loose, the water should flow out in a stream from the tube.

Step 6:

When you are sure it works, hang it on a shelf where people can use it for hand-washing. Keep soap nearby, by threading the soap with string and tie it to the bottle.
