

Household water use guide

Each one of us should adhere to water restriction limits.

See the water restriction guidelines ([English](#) | [Afrikaans](#) | [isiXhosa](#)) as well as an overview ([English](#) | [Afrikaans](#) | [isiXhosa](#)).

The daily limit of 105 litres per person per day is across home, work, school, gym or elsewhere.

Your household usage should be lower than the maximum indicated in the tables below.

Maximum household usage guide		
Number of occupants	Litres per day	Approx. litres per month per household
1	105	3 150
2	210	6 300
3	315	9 450
4	420	12 600
5	525	15 750
6	630	18 900
7	735	22 050
8	840	25 200

Keep in mind that your water usage is affected by leaks on the property that you may be unaware of.

Check and fix all leaks on your property ([English](#) | [Afrikaans](#) | [isiXhosa](#))

CITY CONNECT

If you have more than four people living on your property, you need to [apply to increase your water quota](#). If you don't, you could face hefty fines and have a water management device fitted at your own cost.
