

HOW TO MAKE YOUR OWN BLEACH MIXTURE FOR DISINFECTION OF SURFACES TO PREVENT THE SPREAD OF COVID-19.

1.

MIX 6 teaspoons (30ml) of bleach with 1 litre water OR 1-and-a-half teaspoons with 1 cup of water.

2.

SHAKE the bleach mixture well.

3.

CLEAN all surfaces which are frequently touched. Use regular house soap or detergent.

4.

WIPE OFF regular house soap or detergent from surfaces, before using the bleach mixture.

5.

SPRAY OR APPLY the bleach mixture with a clean cloth on frequently-touched areas.

6.

Allow the bleach mixture to **SETTLE** for 2 minutes on the surface being disinfected.

7.

WIPE with a clean wet cloth (water only).

8.

REPEAT washing and disinfecting of surfaces on a regular basis.

CAUTION:

- Do not mix bleach with any other cleaning product. It will create a highly toxic product.
- Make sure there is lots of fresh air where and when the bleach mixture is applied.
- Clearly label bleach mixture and keep out of reach of children.
- Keep bleach mixture in a container which is well sealed (spill proof if possible).
- Do not swallow or drink bleach mixture. It is highly toxic.
- Do not touch your face during or after disinfection with bleach mixture.
- Wash your hands with soap and water for at least 20 seconds after cleaning.
- Do not store bleach mixture in direct sunlight.
- Dispose of leftover mixture in a drain (sewer, not storm water or streets).
- Make a new solution everyday.
