

CITY OF CAPE TOWN QUARTERLY DRINKING WATER QUALITY REPORT. ANALYTICAL DATA AND APPROXIMATE DISTRIBUTION FOR CAPE TOWN DRINKING WATER. Sample period: 1 April 2024 to 30 June 2024

When our residents open their taps, they can trust their water is reliable, tested, treated and safe to drink. The City of Cape Town is legally required to publish tap water quality analytical data once a year, to demonstrate continued compliance with water quality standards, or inform residents of possible risks. City of Cape Town tap water has for many years maintained ‘excellent’ compliance status with prescribed national drinking water quality standards (SANS 241). The annual tap water quality reports from 2014 are available on the City’s website (www.capetown.gov.za/waterquality). Regular monthly updates are also available on the National Department of Water and Sanitation’s ‘My Water’ page for water quality (<http://ws.dwa.gov.za/IRIS/mywater.aspx>). This ‘excellent’ quality City water costs only 6–8.5c a litre compared to about R15 a litre for shop-bought bottled water. See the water quality results below provided across Cape Town for the 01 April 2024 to 30 June 2024 period.

PARAMETERS	SANS 241:2015 Specifications	BLACKHEATH SUPPLY Typical Analysis MAX 430 Mℓ/day	FAURE SUPPLY Typical Analysis MAX 500 Mℓ/day	KLOOF NEK SUPPLY Typical Analysis MAX 22.5 Mℓ/day	STEENBRAS SUPPLY Typical Analysis MAX 150 Mℓ/day	VOËLVLEI SUPPLY Typical Analysis MAX 273 Mℓ/day	WEMMERSHOEK SUPPLY Typical Analysis MAX 250 Mℓ/day	BROOKLANDS SUPPLY Typical Analysis MAX 5.5 Mℓ/day	HELDERBERG SUPPLY Typical Analysis MAX 12 Mℓ/day	WITZANDS SUPPLY Typical Analysis MAX 15 Mℓ/day
PHYSICAL & AESTHETIC DETERMINANTS										
Colour mg/ℓ Pt-Co	≤15	5	5	5	5	5	5	5	5	5
Conductivity mS/m	≤170	10	12	19	11	15	8	39	16	15

KEY: ND = Not detected
– = No specification or no data

The water treatment plants supply water into an interconnected system of reservoirs and pipelines serving the municipal area.
