

CITY OF CAPE TOWN QUARTERLY DRINKING WATER QUALITY REPORT. ANALYTICAL DATA AND APPROXIMATE DISTRIBUTION FOR CAPE TOWN DRINKING WATER. Sample period: 1 January 2024 to 31 March 2024

When our residents open their taps, they can trust their water is reliable, tested, treated and safe to drink. The City of Cape Town is legally required to publish tap water quality analytical data once a year, to demonstrate continued compliance with water quality standards, or inform residents of possible risks. City of Cape Town tap water has for many years maintained ‘excellent’ compliance status with prescribed national drinking water quality standards (SANS 241). The annual tap water quality reports from 2014 are available on the City’s website (www.capetown.gov.za/waterquality). Regular monthly updates are also available on the National Department of Water and Sanitation’s ‘My Water’ page for water quality (<http://ws.dwa.gov.za/IRIS/mywater.aspx>). This ‘excellent’ quality City water costs only 5c to 8c a litre compared to about R10 a litre for shop-bought bottled water. See the water quality results below provided across Cape Town for the 01 January 2024 to 31 March 2024 period.
