	4	SHARED-NETWORK CHARGE (SNC)		SNC for residential customers is calculated using the group-diversified maximum demand of the property in accordance with guidelines based on the principles of SANS 507-1.						
				In the case of a group housing development or block of flats, SNC is calculated on the sum of the group-diversified maximum demands of all the units plus the undiversified authorised capacity of the general supply, irrespective of the size of the bulk supply.						

ENERGY - ELECTRICITY GENERATION AND DISTRIBUTION (MISCELLANEOUS TARIFFS)										
CAT.	REF	SERVICES RENDERED	UNIT	REMARKS	2022/23 Recalculated excl. VAT	2022/23 R incl. VAT	VAT Yes/No	2023/24 Recalculated excl. VAT	2023/24 R incl. VAT	% Increase / decrease
				For commercial/industrial customers SNC is calculated on the authorised capacity for new connections and on the increase in authorised capacity for supply upgrades.						
				Exempted: Beneficiaries of low cost housing developments, informal settlements, backyard dwellings, temporary supplies and customers listed as indigent as set out in the City's Credit Control and Debt Collection Policy. However, developers of formal Low Cost Housing are not exempted from payment of SNC. They are to include SNC in their state subsidy claim.

	14	UNMETERED CONSUMPTIVE TARIFFS		For radio relay stations, variable message signboards, security and speed trap cameras, and all other installations where metering is not considered feasible by Electricity Generation and Distribution. Calculated using the applicable Small Power User tariff (including Service Charge) for the consumption level of the supply. For larger supplies the AMI Administration Fee that would otherwise be included in the Charge has been removed, as this is not applicable to these supplies. A shared-network charge and a connection fee are payable for all unmetered connections. Unless the connection fee is specified in this schedule, it will be quotable by Electricity Generation and Distribution (Service Connection Planning).
