

1. BE FIRE-WISE

Discuss in groups:

Have your friends and family ever been involved in a fire? What caused it? Could the fire be prevented?

It is important to understand what causes fires so that you know how to prevent them. Large fires that cause extensive damage to property, injuries and even loss of life, can start with small flames that get out of control.

Always ensure that cooking fires are extinguished properly.

Smoking in bed is dangerous!

* Never leave electrical appliances switched on (stoves, heaters, irons, etc.).
* Always put out candles and lamps when not home.
* Do not go to bed or leave your house without checking!

Accidents can happen easily:
* Paraffin lamp knocked over
* Curtain blown into a flame
* Electrical short-circuit
