## CHAIRPERSON'S REPORT

The Chairperson, Cllr Z Sulelo addressed the meeting as follows:

*Good morning Councillors and to the officials joining us via skype and to those that are here with us. Something big happened last Friday and it happened quietly without too much noise. Eskom's price increase was implemented without any uproar. Same thing happens every year and it's the municipalities that will have to deal with the uproar come July. We will have a lot of angry residents to answer to whether we are at fault or not, which is why I am looking forward to the workshop that we will have in two weeks' time to discuss in great detail how we will be spending our budget. We will have to show people what we are doing to be independent of Eskom.*

*The mayor has made a commitment to the citizens and that is to end load shedding in Cape Town over time and that remains one of his top priorities. There is a lot of work to be done in this portfolio and later on the ED will share some key mayoral projects that are being looked at and it will be up to this portfolio to make sure that they succeed because if those projects succeed there will be less people to answer to when load shedding starts again. We have spent millions upgrading our infrastructure and we are currently encouraging people to move switch to prepaid meters as way of managing revenue and keep the collection rate high but also as a tool for citizens to be energy conscious. While we must help people apply for indigent grants, we must also encourage residents to pay their bills.*

*In Langa, we had an indigent grant application event last month and I was shocked to see that one beneficiary had over R600 000 written off over the years. With shrinking budgets every year clearly that is not sustainable which is why we need to understand the budget well and be able to defend the city where necessary.*

*The workshop will help each committee member to have a clear answer on how exactly is the City is planning on protecting residents from loadshedding and also give us an opportunity to track the projects. The City is serious about energy and the Draft*

*energy budget of R16, 4 million speaks to that commitment. The figure on its own means very little to a resident who will want to know why they are getting less units than last year in July 2021. The only thing that might soften the blow is what the City is doing to make sure that the price of electricity doesn't keep going up.*

*In council last month, I listed closely to service delivery debate and the problem of vandalism was pushed back as a City responsibility. The City spends millions replacing vandalised infrastructure instead of rolling out service delivery and the questions was asked ,where is law enforcement.*

*I have said it before but we need to decide if we want to spend more money on security or on service delivery and start being part of the solution by educating residents. On the proposed budget the City has set aside R40 million to help curb and prevent vandalism. While I happy to hear that the City is taking steps to protect its infrastructure this also means that R40 million could have been used to provide more streetlights for areas that need it the most and help protect the most vulnerable in our society. A line needs to be drawn. The report on the agenda on how high voltage lines have been completely taken over, paints a grim picture.*

*Now more than ever we need to invest aggressively on Independent Power Producers ( IPPs) and just last month the City asked the industry to submit new tenders to procure as much as 300 Megawatt (MW) of renewable energy. The launch was followed by an event with the Mayor and Mayco member where the City shared its vision of an independent energy future and where innovation can help realise that dream.*

*The City committed millions for renewable energy and with new partnerships the City will be able to procure more energy at a cheaper rate and transfer that saving to the residents. To attract the investment on embedded solar the City is offering a competitive feed-in tariff to encourage the feed in of excess electricity into the City's grid. Last month we also heard about how the City is planning on incentivising residential users to feed back to the City's grid.*

*Last term we had a committee member that managed to go completely off the grid and invited us to his home to see how he managed to do it. This term when the incentives are clearly outlined, I'm hoping there will be many with this committee that will take up the challenge and supply the City with energy.*

*I thank you.*

**RESOLVED** that the Chairperson's report be noted.

#### **SERVITUDE ENCROACHMENT OF HIGH VOLTAGE (HV) OVERHEAD POWER LINE (OHL) AND UNDERGROUND CABLE NETWORK INFRASTRUCTURE THAT POSE CONTINUITY OF SUPPLY RISKS**

Cllr T Jackson enquired when Subcouncils would get involved in protecting City infrastructure. Cllr T Jackson further questioned if there are plans in place of relocating informal settlements.

Cllr J Solomon suggested that food gardens be created in communities. Cllr J Solomon also indicated that ward committee members have to assist the City in keeping infrastructure safe.

Cllr B Van Reenen indicated that the City budgeted 40 million to protect infrastructure and indicated that residents will be rewarded if cable theft are reported and the perpetrators are caught. The hotline number 0800 65 64 63 can be called to report cable theft.

L Rencontre indicated that the purpose of the report was too highlight the risks, health and safety concerns. Communities would have to be relocated where there are safety concerns in areas where residents live under power lines.

#### **RESOLVED**

That this item remain on the Matters Receiving Attention (MRA) schedule.

That the report on servitude encroachment of High Voltage (HV) Overhead Power Line (OHL) and underground cable network infrastructure that pose continuity of supply risks, be noted.
