- Council

4. DISCUSSION

The Metropolitan Police Department: CCTV Section, inclusive of the Camera Response Unit and Radio Control Centre, ensures that policing is sustained. The use of the surveillance methodology allows for both proactive and reactive policing. The tangible video footage is available for scrutiny, so this report highlight the frequency of South African Police Detectives visiting the surveillance centre for the checking of footage for release and use in active investigations.

## 5. OUTCOMES OF DISCUSSIONS WITH MAYCO MEMBER

The purpose of this report is to inform the Safety and Security Portfolio Committee of the use of City's CCTV camera footage, by the South African Police Services Investigating officers, where they visit the CCTV surveillance centres in Cape Town or Goodwood and review footage.

This assists the detectives to obtain information, in order to further their investigations or acquire good leads from the evidence that we have. The evidence is recorded onto a compact disc and signed out accordingly, should the investigating officer require such evidence for the case.

During the period January to March 2019, the detectives visited the surveillance centres to view one hundred and twenty-two (122) reported cases. The breakdown of viewing for each month is as follows: January 2019 (38), February 2019 (45), March 2019 (39)

The cases viewed range from various crime categories, including ATM incidents, armed robberies and theft out of motor vehicles. The detailed report is attached as Annexure A, B and C.
