

MOTION FOR DISCUSSION BY SUBCOUNCIL 2

MOTIVATION: UPGRADE OF BUILDING CNR OF KHWABABA STREET AND OLD PAARL ROAD BLOEKOMBOS

I am writing this motion with a concern regarding the abandoned and extremely vandalized that is at 46 Khwababa street and Old Paarl road.

This facility is a legacy of the Dignified Public Spaces Programme and was intended to be a "meat market". However, the building was never used after completion due to a lack of interest, ownership and local buy-in.

During 2017, the then Subcouncil 7 previously resolved that the building be demolished, as the repair thereof was too costly.

Due to streetlights are malfunctioning, people to be vulnerable are vulnerable for rape, murder and as well as the dumping site for some of the community members. I as the leader of this very same community propose that the building should be rebuilt so that it could render services that it was intended for since it was built. This will also minimize criminal activities taking place around that corner. I am writing this as community leader as well as the parent that feels the pain of those that have been victims in that area.

I would really appreciate quick intervention from the City of Cape Town officials to see it to them that this problem is resolved in a proper manner

I recommend that an urgent investigation be lodged in order to effect

- a) That an investigation be lodged why this building situated on erf 19885 Bloekombos was never demolished and that urgent measures be taken for the necessary processes be followed to do so;
- b) That an investigation be lodged as to in terms of , leveraging the City s assets and drive economic growth and sustainable growth, in order to improve the management of this site and employ it to maximum benefit in terms of fiscal pressure of maintenance and to serve the need for community needs ;
- c) That budget be provided for the management and development of this site.
